

# VetSecCon 2020!

October 16-17, 2020

[www.vetseccon.com](http://www.vetseccon.com)

We are now only 8 days away from the kick-off of our first VetSecCon, and we can't wait to get started!

First, I want to acknowledge and thank our sponsors. Without their help, none of this would be possible. At the **Silver Sponsorship** level is CrowdStrike and Quadrant Information Security.

**CrowdStrike** is a leading provider of endpoint security, threat intelligence, and cyberattack response services.

**Quadrant Information Security** is a consulting firm committed to supporting organizations with Managed Security Services and Enterprise Security Consulting.

At the **Bronze Sponsorship** level is Layer 8 Conference

**Layer 8 Conference** is the first conference to be solely focused on social engineering and intelligence gathering. This year, it was held on Saturday, June 6<sup>th</sup>, all virtually!

We have an exciting lineup of speakers for all of you, and are proud to welcome Chloé Messdaghi, VP of Strategy at Point3 Security, as our Keynote Speaker. Chloe's Keynote is titled, "The Elephant in the Room: Burnout," addressing burnout in the InfoSec industry. As veterans, this is something that is deeply connected to the military lifestyle as well.

In addition, we have three awesome tracks, featuring 28 individual speakers giving workshops in their respective fields.

The **Technical Track** is all about the technical side of InfoSec. There's a talk on Building Web Application Labs with WebSploit, one on Android Vulnerability Exploitation, and one on Malware Reverse Engineering, just to name a few.

The **Transition Track** is all about helping veterans transition out of the military and into Cyber Security. We have a talk on The Veteran Roadmap to Becoming a Penetration Tester, Breaking Into CyberSecurity: What You Should Be Doing Now, and more!

The **Humanity Track** is featuring the human side of InfoSec. This is where we feature speakers and companies doing good to battle the social and economic issues affecting our industry and technology as a whole. The CEO of the CyberCrime Support Network will be speaking, along with others.

**If you haven't registered, come see us at <https://vetseccon.com> and sign up today!**
